## INTRODUCTION

Plaintiffs seek to eviscerate the 340B drug discount program (“340B Program”), which provides discounts to safety-net providers known as “covered entities,” many of which cannot afford to operate their own pharmacies or cannot fulfill their patients’ pharmaceutical needs through their own pharmacies. Contract pharmacies are the only way that many covered entities—including Amici Little Rivers Health Care, Inc. (“Little Rivers”) and FamilyCare Health Centers (“FamilyCare”) and many of the members of the National Association of Community Health Centers (“NACHC”) and Ryan White Clinics for 340B Access (“RWC-340B”)—can obtain 340B discounted drugs. Plaintiffs Eli Lilly and Company and Lilly USA, LLC (collectively “Lilly”) attempt to create a boogeyman of for-profit contract pharmacy companies by misrepresenting how covered entities’ 340B contract pharmacy arrangements actually work. No party to this litigation is a 340B covered entity, and Amici, which are covered entities and their membership organizations, submit this brief to inform the Court of how contract pharmacy arrangements enable safety-net health care providers to receive critically necessary discounts on outpatient drugs. If Lilly succeeds in this litigation, covered entities that operate on narrow margins and serve low-income, rural, and medically fragile patients will be shut out of the 340B Program because they will have no way to distribute drugs to their patients. This is Lilly’s endgame—to increase its profits by excluding from the 340B Program the very health care providers Congress intended to benefit when it enacted the 340B Program.

Plaintiffs are obligated to sell discounted drugs to nonprofit covered entities, and covered entities have relied on contract pharmacy arrangements for over twenty years to distribute drugs to their patients. Many covered entities do not operate in-house pharmacies because the requirements to obtain and maintain a pharmacy license are complex and operating a pharmacy

is expensive. One of the largest costs of opening a pharmacy—acquiring the initial drug inventory at standard prices—is precisely the type of expenditure the 340B Program is designed to reduce. Many covered entities wisely choose not “to expend precious resources to develop their own in-house pharmacies.” Notice Regarding Section 602 of the Veterans Health Care Act of 1992; Contract Pharmacy Services, 61 Fed. Reg. 43,549, 43,550 (Aug. 23, 1996) (“Contract Pharmacy Notice”).

Both the longstanding history of the 340B Program and the welfare of safety-net providers were compromised when Lilly unilaterally advanced a self-serving reinterpretation of the 340B statute and led other drug companies on a campaign to undermine the 340B Program by cutting off discounts on drugs shipped to covered entities’ contract pharmacies. After having failed to convince the Department of Health and Human Services (“HHS”) to bless its unlawful and unprecedented acts,<sup>1</sup> and with both houses of Congress evidently against it,<sup>2</sup> Lilly turned to the judiciary to condone its unlawful behavior.<sup>3</sup> Lilly currently seeks to gut this vital federal drug pricing program by asking the Court to vacate the 340B Administrative Dispute Resolution (“ADR”) regulations, which provide the sole forum for covered entities to challenge drug company overcharges, and override a clear and well-reasoned HHS cease-and-desist letter finding that Lilly is in violation of the 340B statute and commanding it to cease its unlawful

---

<sup>2</sup> See Letter from Members of Congress to Alex M. Azar II at 1 (Sept. 14, 2020), ECF No. 19-5 at 47–48; Letter from United States Senators to Alex M. Azar II at 1 (Sept. 17, 2020), [https://www.baldwin.senate.gov/imo/media/doc/20200917%20Letter%20to%20HHSRA\\_340B%20Enforcement\\_Final.pdf](https://www.baldwin.senate.gov/imo/media/doc/20200917%20Letter%20to%20HHSRA_340B%20Enforcement_Final.pdf); Letter from House Committee on Energy & Commerce to Alex M. Azar II at 1 (Sept. 3, 2020), <https://energycommerce.house.gov/sites/democrats.energycommerce.house.gov/files/documents/HHS.2020.9.3.%20Final.pdf>.

<sup>3</sup> Lilly’s litigation strategy is not limited to this suit. See, e.g., Mem. in Supp. of Eli Lilly and Co’s Mot. to Intervene, ECF No. 12-1, *RWC-340B v. Azar*, No. 1:20-cv-02906 (D.D.C. filed Oct. 9, 2020) (stayed).

behavior.<sup>4</sup>

The nation's healthcare safety-net and countless underserved communities will continue to be significantly harmed if the Court ratifies Lilly's refusal to sell its 340B drugs to covered entities that dispense through contract pharmacies. This case impacts *thousands* of covered entities delivering health care to *millions* of Americans, many of whom are among our most medically underserved and vulnerable. To divert attention from its own profit motive, Lilly attempts to villainize large chain pharmacies and mischaracterizes them as de facto covered entities. But contract pharmacies are not covered entities, do not function as covered entities, and do not purchase 340B discounted drugs. Contract pharmacies are simply the sites where patients pick up drugs prescribed and purchased by covered entities. Lilly cannot dismiss covered entities and their patients by shining the spotlight on for-profit retail pharmacies any more than it can hide the true motivation behind this suit in meritless arguments against the legality of over twenty-four years of well-recognized practice within the U.S. drug distribution system and regulations that were ten years in the making and crucial for covered entities to vindicate their rights under the 340B statute. The truth is that Lilly's unlawful acts damage covered entities that treat the most vulnerable patients and are motivated by Lilly's desire to increase profits.

Lilly would have the Court rewrite the 340B statute to exclude many covered entities from participating in the 340B Program and simultaneously deprive covered entities of their one and only statutory remedy against Lilly. In essence, Lilly wants the lucrative benefit of its Pharmaceutical Pricing Agreement with HHS—having its products covered under Medicare and Medicaid—without the associated burden of offering 340B pricing to covered entities. Without access to 340B pricing and contract pharmacy distribution systems, covered entities will

---

<sup>4</sup> Letter from Diana Espinosa to Derek L. Asay (May 17, 2021) ("May 17 letter"), ECF No. 103-17.

inevitably be forced to cut services and staff that are supported by 340B discounts, and patients will lose access to low-cost medications, leaving many to face the potentially life-threatening choice of forgoing their prescriptions altogether.

No covered entity is a party to this action, but all covered entities will be negatively impacted if the Court grants Lilly's motion to vacate HHS's May 17 cease-and-desist letter and the ADR Rule. Amici have a significant interest in the continued viability of the 340B Program, including the ADR process, because three of the Amici have ADR petitions currently pending, several Amici have filed suit to compel the Secretary to implement ADR, and one court has held that ADR provides the sole forum for covered entities to challenge drug company overcharges.<sup>5</sup> Amici therefore support the Defendants' motion to dismiss and motion for summary judgment, ECF No. 88, and oppose Plaintiffs' cross-motion for summary judgment ECF No. 89 ("Lilly Mot. SJ"). Simply put: Amici urge the Court to protect the nation's safety-net as Congress intended.

## ARGUMENT

### **I. Lilly Misrepresents Contract Pharmacy Relationships, Which Have Been a Critical Component of the 340B Program for More Than Two Decades**

Lilly mischaracterizes the contract pharmacy model as a massive forced giveaway to large, corporate chain pharmacies. Lilly Mot. SJ at 25, 29, 34-35. But contract pharmacies do not purchase 340B drugs. The covered entity buys drugs at 340B discounts and directs the drugs to be shipped to a contract pharmacy, which stores and dispenses the drugs to the covered entity's patients, and, importantly, remits third-party payments and/or patient co-payments to the

---

<sup>5</sup> NACHC filed ADR claims on behalf of 225 federally qualified health centers ("FQHCs") on January 13, 2021; Little Rivers filed its petition on February 4, 2021; and FamilyCare filed its petition on February 12, 2021. On November 23, 2020, Little Rivers and FamilyCare filed suit to compel promulgation of ADR regulations. *RWC-340B v. Azar*, No. 1:20-cv-02906 (D.D.C. Nov. 23, 2020) (stayed). NACHC filed a similar suit on October 21, 2020. *NACHC v. Azar*, No. 1:20-cv-03032 (D.D.C. filed Oct. 21, 2020) (stayed).

covered entity, minus the pharmacy's fee, while providing needed pharmaceutical and convenience to often underserved communities.

Lilly asserts that HHS "commands" it "to sell outpatient drugs at 340B discounts to contract pharmacies" and "provide discounts to an unlimited number of for-profit retail chains." Lilly Mot. SJ at 12, 15. HHS has not required Lilly to "sell" drugs or "provide discounts" to contract pharmacies. The sale is to the covered entity, which is the entity that receives savings and revenue contemplated by the 340B statute. Lilly cites a 2014 HHS Office of Inspector General ("OIG") report on contract pharmacies several times but neglects to mention that OIG confirmed that "the *covered entity purchases* . . . the drug at the discounted 340B price and has it delivered to the contract pharmacy." HHS-OIG, *Contract Pharmacy Arrangements in the 340B Program*, OEI-05-13-00431, at 5 (Feb. 4, 2014) ("2014 HHS-OIG Report") (emphasis added)<sup>6</sup>; *see also* Contract Pharmacy Notice, 61 Fed. Reg. at 43,552 ("The contract pharmacy does not purchase the drug. Title to the drugs passes to the covered entity."); Lilly Mot. SJ 28 n.4, 32, 40 (discussing 2014 HHS-OIG Report). The contract pharmacy is merely the dispensing location, contrary to Lilly's characterization.

Typically, health care providers purchase a pharmaceutical manufacturer's drugs from third-party wholesalers. A covered entity will establish a 340B account with the wholesaler, under the covered entity's name, enabling the covered entity to purchase 340B discounted drugs. If the covered entity has one or more contract pharmacies, the wholesaler creates a "bill-to, ship-to" arrangement in which the drugs are billed to the covered entity and shipped to the contract pharmacy. *See* HRSA, *FAQs, What is a "ship to bill to" arrangement?*<sup>7</sup> Wholesalers do not establish 340B accounts for contract pharmacies, which are not eligible for these discounts.

---

<sup>6</sup> <https://oig.hhs.gov/oei/reports/oei-05-13-00431.asp>

<sup>7</sup> <https://www.hrsa.gov/opa/faqs/index.html/>

Lilly also takes issue with the “replenishment model” in which a contract pharmacy dispenses a non-340B drug to a covered entity’s patient from the pharmacy’s inventory, and the covered entity then places a replenishment order for the same drug at 340B discounted prices. Lilly mischaracterizes replenishment orders as “demands for 340B drugs from manufacturers . . . made by a contract pharmacy.” Lilly Mot. SJ at 28 n.4 (citing 2014 HHS-OIG Report, at 5), 32. But any “demand” comes from the covered entity ordering the replenishment drug. The replenishment model is merely an accounting tool, which reconciles all 340B and non-340B sales after the fact and thereby ensures that 340B discounted drugs are dispensed only to 340B-eligible patients. Far from causing diversion to ineligible patients, the replenishment model’s reconciliation process serves as an accurate and effective means to protect *against* diversion.

The alternative to the replenishment model is for the pharmacy to maintain a supply of drugs that the covered entity has pre-purchased at 340B discounts. *See* 2014 HHS-OIG Report at 5 (discussing “pre-purchased inventory model”). The pre-purchased inventory model, however, is a poor fit for most 340B contract pharmacy arrangements for at least two reasons. First, a pre-purchased inventory is just that—an expense to the covered entity in advance of a potential prescription. Such inventory would go to waste if it expires and is never dispensed. Second, the pharmacy often does not know whether the individual who presented the prescription is a patient of a covered entity at the time the prescription is dispensed. Without that real-time information, the pharmacy cannot effectively use a pre-purchased 340B inventory. Even if that information were available, a pre-purchased inventory model introduces an element of risk because it requires a busy pharmacist or technician to select the correct inventory when dispensing. In contrast, under the replenishment model, the pharmacy fills all prescriptions from its inventory, and that inventory is replenished with 340B drugs purchased by the covered entity only to the

extent that the contract pharmacy filled prescriptions for the covered entity's own patients, as determined outside the bustle of the pharmacy environment.

The replenishment model also helps prevent duplicate discounts. The 340B statute protects manufacturers from providing a 340B discount and a Medicaid rebate on the same drug. 42 U.S.C. § 256b(a)(5)(A). To comply with this requirement, some covered entities “carve out” Medicaid patients, which means that these covered entities do not dispense 340B discounted drugs to any Medicaid patients. *See* HRSA, *Duplicate Discount Prohibition*.<sup>8</sup> Patients are often retroactively enrolled in Medicaid, and an individual's Medicaid status may not be known at the time the prescription is filled. By the time replenishment occurs, the covered entity will have updated information on its patients' Medicaid status. The replenishment model thus helps ensure that manufacturers are protected from paying duplicate discounts.

There is nothing nefarious or unusual about replenishment inventory systems. As the HHS OGC explained, replenishment is a common inventory management tool in many enterprises. Advisory Op. at 6 n.6. Moreover, the Supreme Court has endorsed an inventory replenishment system as compliant with a statutory scheme analogous to 340B. In *Abbott Laboratories v. Portland Retail Druggists Ass'n, Inc.*, the Supreme Court analyzed whether hospital purchases through group purchasing organizations are consistent with federal antitrust law, which permits certain health care providers to purchase discounted drugs for some patients (as does 340B). *Abbott Laboratories v. Portland Retail Druggists Ass'n, Inc.*, 425 U.S. 1, 3-4 (1976). The Supreme Court *recommended* a replenishment system in which providers manage their inventories according to general accounting principles by adjusting inventories at a later

---

<sup>8</sup> <https://www.hrsa.gov/opa/program-requirements/medicaid-exclusion/index.html>. Other covered entities “carve in” Medicaid patients by furnishing 340B discounted drugs to Medicaid patients and then informing the state Medicaid program of the 340B purchases. *Id.*

date. *Id.* at 20-21.

## **II. Lilly Seeks to Undo a Statutorily Required Program In which It Participated for More Than Two Decades**

Lilly not only asks this Court to reverse the HHS May 17 letter, but also to shield its unlawful conduct by vacating the ADR Rule. Such an outcome would upset more than two decades of practice, free Lilly from its legal and contractual obligations, run counter to Congress's intentions for covered entities, and significantly damage the viability of the nation's health care safety net. Until Lilly and other drug companies unilaterally violated federal law and their contracts with HHS, covered entities relied on contract pharmacies to best serve their patients' pharmaceutical needs, consistent with Congress's intent and HHS's longstanding interpretations of both Sections 330 and 340B of the Public Health Service Act.<sup>9</sup> Congress intended drug manufacturers to honor their statutory and contractual obligations to provide discounted drugs to covered entities, allowing covered entities to rely on 340B savings and revenue to fund crucial aspects of their safety-net operations.

Despite honoring contract pharmacy arrangements for at least twenty-four years, in the summer of 2020, Lilly led the charge in cutting off covered entity access to 340B pricing by either refusing outright to honor contract pharmacy arrangements or imposing onerous conditions that effectively eliminated covered entities' access to drugs at 340B pricing. HRSA, *Manufacturer Notices to Covered Entities* (July 2020);<sup>10</sup> Eli Lilly & Co., *Limited Distribution Plan Notice for Eli Lilly and Company Products* (Sept. 1, 2020) ("Lilly LDP").<sup>11</sup> Other drug

<sup>11</sup> [https://www.rwc340b.org/wp-content/uploads/2020/12/Eli-Lilly-and-Company\\_Limited-Distribution-Plan\\_Public-Notice\\_Sept-1-2020.pdf](https://www.rwc340b.org/wp-content/uploads/2020/12/Eli-Lilly-and-Company_Limited-Distribution-Plan_Public-Notice_Sept-1-2020.pdf)

companies took strikingly similar actions to halt 340B pricing on drugs shipped to contract pharmacies, effective during September and October 2020. *See* Letter from Gerald Gleeson, Vice President & Head, Sanofi US Market Access Shared Services, SanofiAventis U.S. LLC (July 2020);<sup>12</sup> Letter from Odalys Caprisecca, Exec. Dir., Strategic Pricing & Operations, AstraZeneca PLC (Aug. 17, 2020);<sup>13</sup> Letter from Daniel Lopuch, Vice President Novartis Managed Mkts. Fin., Novartis Pharmaceuticals Corp. (Aug. 17, 2020).<sup>14</sup> Three months later, Novo Nordisk, Inc. and United Therapeutics Corporation likewise adopted limitations similar to Lilly's. *See* Letter from Novo Nordisk Inc. to Covered Entities (Dec. 1, 2020);<sup>15</sup> Letter from Kevin Gray, Senior Vice President, Strategic Operations, United Therapeutics Corporation (Nov. 18, 2020).<sup>16</sup> Hundreds of other drug company participants continue to honor their contract pharmacy obligations, consistent with established practice, but these drug companies may be emboldened to follow Lilly's and its compatriots' lead if the May 17 letter and ADR Rule are invalidated.

HHS, through its Health Resources and Services Administration ("HRSA"), has consistently interpreted the 340B statute to require drug companies to sell discounted drugs for shipment to covered entities' contract pharmacies. *See, e.g.*, Contract Pharmacy Notice, 61 Fed. Reg. at 43,549–50 ("There is no requirement for a covered entity to purchase drugs directly from the manufacturer or to dispense drugs itself. . . . Congress envisioned that various types of drug delivery systems would be used to meet the needs of the very diversified group of 340B covered entities."); Notice Regarding 340B Drug Pricing Program-Contract Pharmacy Services, 75 Fed.

<sup>14</sup> Novartis has since retreated, in part, by shipping to federal grantees' contract pharmacies and to hospital contract pharmacies within a 40-mile radius. Letter from Daniel Lopuch, Vice President Novartis Managed Mkts. Fin., Novartis Pharmaceuticals Corp. (Oct. 30, 2020).

<sup>15</sup> <https://bit.ly/2NQIzpc>.

<sup>16</sup> <https://bit.ly/3pNrfgZ>.

Reg. 10,272, 10,275 (Mar. 5, 2010). HHS confirmed this longstanding interpretation in its May 17 letter to Lilly, noting that “[n]othing in the 340B statute grants a manufacturer the right to place conditions on its fulfillment of its statutory obligation to offer 340B pricing on covered outpatient drugs purchased by covered entities.”<sup>17</sup>

In 1996, HRSA acknowledged that covered entities were already using contract pharmacies to dispense 340B drugs. Contract Pharmacy Notice, 61 Fed. Reg. at 43,550 (“[A] number of large organizations” were using a contract pharmacy model, which was developed “as early as 1993”). At that time, HRSA explained why contract pharmacies are essential for the “many covered entities” that “do not operate their own licensed pharmacies”:

Because these covered entities provide medical care for many individuals and families with incomes well below 200% of the Federal poverty level and subsidize prescription drugs for many of their patients, it was essential for them to access 340B pricing. Covered entities could then use savings realized from participation in the program to help subsidize prescriptions for their lower income patients, increase the number of patients whom they can subsidize and expand services and formularies.

Contract Pharmacy Notice, 61 Fed. Reg. at 43,549.

When Congress created the 340B Program in 1992, it had every reason to anticipate that FQHCs, Ryan White Clinics (“RWCs”), and other covered entities would use pre-existing authority and flexibility to provide drugs to their patients through contracts with private pharmacies, instead of—or in addition to—doing so through an in-house pharmacy. As community and patient-based providers, FQHCs necessarily have flexibility to determine how best to meet the needs of their patients and communities, but FQHCs must—and do—use any 340B savings and revenue (as well as any other income generated from grant-supported activities) to further their health center projects. 42 U.S.C. § 254b(e)(5)(D). FQHCs have long

---

<sup>17</sup> <https://www.hrsa.gov/sites/default/files/hrsa/opa/pdf/hrsa-letter-eli-lilly-covered-entities.pdf>.

had an express grant of authority to provide their services, including pharmacy services, either directly through their own staff or through contracts or cooperative arrangements with other entities, or a combination thereof. *See, e.g.*, Public Health Service Act, Pub. L. 78-410, § 330(a), 58 Stat. 682, 704 (1944) (“For purposes of [Sec. 330], the term ‘health center’ means an entity that serves a population that is medically underserved . . . either through the staff an (sic) supporting resources of the center or through contracts or cooperative arrangements”); Special Health Revenue Sharing Act of 1975, Pub. L. 94-63, § 501, 89 Stat. 304, 342–43 (1975) (amending § 330(a) of the Public Health Service Act to read: “For purposes of this section, the term ‘community health center’ means an entity which either through its staff and supporting resources or through contracts or cooperative arrangements with other public or private entities provides” health care services, including “pharmaceutical services”).

Lilly argues that the agency relationship between covered entities and their contract pharmacies is a fiction. Lilly Mot. SJ at 27-32. But Lilly and other manufacturers are currently selling drugs to covered entities to be distributed through their contract pharmacies, albeit at much higher prices than the 340B discounted price. Most covered entities have discontinued purchasing drugs through their contract pharmacies from Lilly and other manufacturers that have adopted policies similar to Lilly’s. Other covered entities continue to purchase drugs from Lilly and other manufacturers with similar policies through contract pharmacy arrangements, but the covered entities are buying those drugs at much higher prices. Lilly, therefore, recognizes that an agency relationship exists when it is able to sell drugs to a covered entity through its contract pharmacy at non-discounted prices.

Contract pharmacy arrangements are not unique to the 340B Program. They are a well-established means for non-profit health care providers to dispense drugs to their patients. In

2010, the Federal Trade Commission (“FTC”) recognized the right of certain non-profit organizations to contract with for-profit retail pharmacies to dispense discounted drugs within the parameters of the Robinson-Patman Antidiscrimination Act (“Robinson-Patman Act”) and the Non-Profit Institutions Act (“NPIA”).<sup>18</sup> See Federal Trade Commission, University of Michigan Advisory Op., Letter to Dykema Gossett (Apr. 9, 2010).<sup>19</sup> Both the 340B statute and NPIA provide for the purchase, and restrict the resale, of discounted drugs by non-profit healthcare entities. 15 U.S.C. § 13c; 42 U.S.C. § 256b(a)(5)(B). The NPIA provides an exemption from antitrust laws for certain resales of discounted drugs purchased by a non-profit hospital. The FTC examined and approved the exact contract pharmacy model at issue here, with only one difference—the drugs dispensed by the contract pharmacies were subject to discounts obtained under the NPIA, not the 340B statute. *Id.*

The 340B Program exists to assist covered entities “to stretch scarce Federal resources as far as possible, reaching more eligible patients and providing more comprehensive services.” H.R. Rep. No. 102-384(II), at 12 (1992). When HHS formally recognized the contract pharmacy model in 1996, it acknowledged that drug manufacturers were already, either directly or through wholesale distributors, shipping 340B drugs purchased by covered entities to contract pharmacies. Contract Pharmacy Notice, 61 Fed. Reg. at 43,550. All but a handful of the hundreds of drug manufacturers participating in the 340B Program continue to do so.

Covered entities have long used 340B Program savings and revenue as Congress

---

<sup>18</sup> Congress enacted the Robinson-Patman Act to protect small businesses from larger businesses using their size advantages to obtain more favorable prices and terms from suppliers and to prohibit discrimination in the sale of fungible products, including drugs. 15 U.S.C. §§ 13–13b. The Robinson-Patman Act added the NPIA, which permits manufacturers to sell discounted medical supplies, including drugs, to certain non-profit entities by exempting “purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit” from the Robinson-Patman Act’s prohibitions against price discrimination. *Id.* § 13c.

<sup>19</sup> <https://www.ftc.gov/sites/default/files/documents/advisory-opinions/university-michigan/100409univmichiganopinion.pdf>.

intended: to enable and expand health care services to populations desperately in need of care, including populations affected by a public health crisis or to serious chronic conditions. Money saved or generated by covered entities through the 340B Program covers the cost of medications for uninsured or underinsured patients, and funds expanded access to necessary medical and crucial enabling services. These services include, for example, medication therapy management, behavioral health care, dental services, vaccinations, case management and care coordination services, translation/interpretation services for patients with limited English language ability, and transportation assistance that enables patients to reach their health care appointments.

Lilly attacks the ADR Rule and HHS's May 17 cease-and-desist letter to prolong its unprecedented and self-serving refusal to provide covered entities access to drugs at 340B discount pricing in violation of federal law. Lilly ignores that, for decades, covered entities have, as Congress intended, structured their safety-net operations in reliance on 340B discounts, which are often accessible only through contract pharmacies.

### **III. Granting Lilly's Motion for Summary Judgment Will Inflict Significant Harms on Covered Entities and Their Patients and Compromise Vital Safety-Net Services Throughout the Nation**

Nowhere in Lilly's court filings does Lilly discuss the vast uncompensated or undercompensated safety-net services provided by covered entities by virtue of 340B savings and revenue, much of which is attainable only from contract pharmacy arrangements. Covered entities are on the front lines of caring for our nation's most vulnerable patients and use 340B discounts to support their missions of increasing access to care, improving health outcomes, and fortifying the nation's safety net. Lilly seeks to upend the 340B Program by removing access to discounted drugs for covered entities that must rely on contract pharmacies. Denying 340B pricing is antithetical to Congress's design of the 340B Program, which is intended to expand care to patient populations served by safety-net providers. Without 340B savings, covered

entities cannot possibly “reach[] more eligible patients and provid[e] more comprehensive services” to those patients. H.R. Rep. No. 102–384(II), at 12 (1992). Indeed, Lilly’s deprivation of 340B Program benefits has already harmed covered entities, their patients, and their broader communities, because covered entities have had to reduce critical services supported with 340B-derived funding. Eliminating 340B contract pharmacy arrangements will directly and indirectly harm our nation’s most vulnerable communities by denying them affordable medications, critical health care, and related services that covered entities are able to provide through 340B Program participation. Other drug companies will likely believe the Court has broadly authorized drug manufacturers to stop shipping covered entity-purchased drugs to contract pharmacies. Such an outcome could cause many safety-net providers to shut their doors. These outcomes would be tragic at any time, but after over a year of covered entities serving on the front lines of the COVID-19 pandemic, they are unconscionable.

**A. Covered Entities Use 340B Contract Pharmacy Savings to Provide Deep Discounts on High-Cost Medications to Eligible Patients**

The 340B Program enables covered entities to offer discounted drugs to financially needy patients. For example, FamilyCare, a West Virginia-based FQHC, has a drug discount program that allows indigent patients to pay only FamilyCare’s cost for the drug. Glover Aff. ¶ 17.<sup>20</sup> Because 340B discounted prices are significantly lower than non-340B prices, patients who relied on obtaining medications at the 340B cost now have to pay much higher costs. Glover Aff. ¶ 30. Vermont-based FQHC Little Rivers operates a similar drug discount program that

---

<sup>20</sup> The following declarations are included in the record as exhibits in Amici’s Brief in Support of Defendant’s Opposition to Plaintiffs’ Motion for Preliminary Injunction, ECF No. 75 (Mar. 9, 2021): Declaration of Craig Glover, MBA, MA, FACHE, CMPE, President and CEO of FamilyCare (ECF No. 75-3, “Glover Aff.”); Declaration of Terri S. Dickerson, CFO of WomenCare, Inc., dba FamilyCare Health Center (ECF No. 75-4, “Dickerson Aff.”). The declarations were originally submitted as exhibits in a lawsuit by three Amici against HHS, Mot. for TRO and Prelim. Inj., RWC-340B v. Azar, No. 1:20-cv-02906 (D.D.C. Nov. 23, 2020), ECF No. 24, (stayed Jan. 13, 2021).

subsidizes the costs of drugs for financially needy patients. Auclair Aff. ¶ 18<sup>21</sup> (patients pay a percentage of costs, including \$0, on an income-based sliding scale). Little Rivers, and other covered entities, or their patients, are now bearing the increased cost of Lilly's drugs for prescriptions filled at contract pharmacies. Auclair Aff. ¶¶ 23, 27, 30, 31–34 (Little Rivers will struggle financially if forced to continue incurring these increased costs).

The inability of financially needy patients to access drugs at 340B prices is particularly problematic for insulin-dependent diabetics, whose survival depends on daily access to insulin and who are faced with increasing insulin prices. The astronomical increase in the price for insulin products in recent years is well documented. *See, e.g.*, Insulin: Examining the Factors Driving the Rising Cost of a Century Old Drug, Senate Report, 6 (“The WAC [wholesale acquisition cost] prices of long- and short-acting insulins have risen steeply.”)<sup>22</sup>; American Diabetes Association, Diabetes Care, Insulin Access and Affordability Working Group: Conclusions and Recommendations, Jan. 2018 (“The average list price of insulin has skyrocketed in recent years, nearly tripling between 2002 and 2013”).<sup>23</sup> For example, between 2009 and 2019, the list price for a 10-milliliter vial of Humalog, a fast-acting insulin produced by Lilly, rose from \$93 to almost \$275, a 295% increase. Rachel Gillett & Shyanne Gal, *One Chart Reveals How the Cost of Insulin Has Skyrocketed in the US, Even Though Nothing About it Has Changed*, Business Insider (Sept. 18, 2019).<sup>24</sup> During the same period, U.S. inflation was only 22%. U.S. Bureau of Labor Statistics, *CPI Inflation Calculator*.<sup>25</sup>

Little Rivers reviewed the difference in the 340B and non-340B price for one of Lilly's

---

<sup>21</sup> The Declaration of Gail Auclair, M.S.M.-H.S.A., B.S.N., R.N, CEO of Little Rivers Inc. is submitted as Exhibit A to this brief (Ex. A, “Auclair Aff.”).

<sup>22</sup> Available at [https://www.finance.senate.gov/imo/media/doc/Grassley-Wyden%20Insulin%20Report%20\(FINAL\).pdf](https://www.finance.senate.gov/imo/media/doc/Grassley-Wyden%20Insulin%20Report%20(FINAL).pdf)

<sup>23</sup> Available at <https://care.diabetesjournals.org/content/41/6/1299>.

<sup>24</sup> <https://www.businessinsider.com/insulin-price-increased-last-decade-chart-2019-9>.

<sup>25</sup> [https://www.bls.gov/data/inflation\\_calculator.htm](https://www.bls.gov/data/inflation_calculator.htm) (\$1 in January 2009 for buying power in December 2019).

insulin products, Humalog® KwikPen. On May 23, 2021, the 340B price for this product was only \$0.16, but the average wholesale price was \$636.48 and the wholesale acquisition cost was \$636.48. Auclair Aff. ¶ 35. Under the patient assistance programs provided by FamilyCare and Little Rivers, and prior to Lilly's new policy on contract pharmacies, a financially needy diabetic patient was able to fill a prescription for Humalog® KwikPen based on the 340B pricing, but now faces a price that is thousands of times higher and will continue to rise if insulin prices continue on their current trajectory. Lilly is increasing the price for insulin at the same time it refuses to offer 340B discounts to covered entities that choose to dispense insulin to their patients through contract pharmacies. Lilly's policy is not only financially harmful; it can impact a patient's health. The American Diabetes Association has reported that the high cost of insulin may impact patients' health because patients faced with these high costs "may be less adherent to recommended medication dosing and administration, resulting in harm to their health." American Diabetes Association, Diabetes Care, Insulin Access and Affordability Working Group: Conclusions and Recommendations, Jan. 2018.<sup>26</sup> Covered entities like Little Rivers have absorbed these increased costs to date, but they cannot afford to do so indefinitely.

Through contract pharmacies, uninsured and under-insured covered entity patients fill prescriptions at convenient locations, often at a greatly reduced or no cost. FQHCs and RWCs care for increasing numbers of patients with chronic conditions that are managed primarily through prescription drugs. From 2013 through 2018, the number of FQHC patients with HIV increased 66% (from 115,421 to 191,717), patients with substance use disorders increased 80% (from 506,279 to 908,984), and patients with depression, mood and anxiety disorders increased by 72% (from 2,740,638 to 4,724,691). Sara Rosenbaum et al., *Cnty. Health Ctrs. Ten Years*

<sup>26</sup> Available at <https://care.diabetesjournals.org/content/41/6/1299>.

*After the Affordable Care Act: A Decade of Progress and the Challenges Ahead*, Geiger Gibson RCHN Community Health Foundation Research Collaborative (Mar. 2020).<sup>27</sup>

With discounted drugs no longer available at covered entities' contract pharmacies, many covered entity patients lost access to lifesaving medications. Lilly has made a tiny concession to allow covered entities to use *one* contract pharmacy if they do not operate their own in-house pharmacies, but Lilly's policy does little to aid many indigent covered entity patients who cannot access that one pharmacy.<sup>28</sup> Covered entities serving remote or rural areas in particular have lost access to discounted drugs over large geographic areas, making it nearly impossible for their patients to access affordable medications.<sup>29</sup> See, e.g., Simila Aff. ¶ 27 ("[t]he travel distance between our northern most and southern most clinical delivery sites is 200 miles."); Francis Aff. ¶ 19 ("Erie's ability to offer our patients—who are dispersed across more than 185 zip codes—access to affordable life-saving and life-sustaining medications is entirely dependent on our contract pharmacy partnerships."); Chen Aff. ¶ 21 ("NCHC's service area spans approximately 576 miles across all of Northern Arizona. Without contract pharmacies, patients would have to travel [35-180 miles] (one-way trip), to reach the closest of NCHC's in-house pharmacies").

FamilyCare serves a very large area in rural West Virginia and uses contract pharmacy arrangements across its service area to meet its patients' pharmaceutical needs. Glover Aff. ¶ 19 (noting that its contract pharmacy network enables FamilyCare to provide patients discounted

---

<sup>27</sup> <https://www.rchnfoundation.org/wp-content/uploads/2020/03/FINAL-GG-IB-61-ACA-CHC-3.4.20.pdf>.

<sup>28</sup> Moreover, implementation of this exception has taken several months for some covered entities.

<sup>29</sup> The record contains affidavits from an ADR petition filed by Amicus NACHC, on behalf of 225 FQHC covered entities, against Lilly and other manufacturers for unlawful overcharging. The following NACHC declarations were submitted as part of Exhibit D to Plaintiff's Motion for PI, ECF No. 19-5: Declaration of Donald A. Simila, Upper Great Lakes Health Center, Inc. ("Simila Aff."); Declaration of Lee Francis, Erie Family Health Center ("Francis Aff."); Declaration of Kimberly Christine Chen, North County HealthCare, Inc. ("NCHC") ("Chen Aff."); Declaration of Ludwig M. Spinelli, Optimus Health Care Inc., ("Spinelli Aff."); Declaration of J.R. Richards, Neighborhood Improvement Project, Inc., d/b/a Medical Associates Plus ("Richards Aff."); Declaration of Heather Rickertsen, Crescent Community Health Center ("Rickertsen Aff."); and Declaration of Jackson Mahaniah, Lynn Community Health Center ("Mahaniah Aff.").

drugs near their homes); *see also* Simila Aff. ¶ 26 (“a single pharmacy for all our patients would severely limit our patients access to life saving medications”). Hudson Headwaters Health Network (“HHHN”), an FQHC based in upstate New York, provides care to over 90,000 patients across a 7,000 square-mile area that HHS designated as a Health Professional Shortage Area. Slingerland Aff. ¶ 10. HHHN’s service area has only one major road that traverses from North to South, other roads are often impassable in the winter, and the service area is generally not served by public transport. Slingerland Aff. ¶ 10.<sup>30</sup> HHHN uses contract pharmacies to minimize the many “geographic and logistical barriers” that its patients face to access affordable medications. Slingerland Aff. ¶ 10. FQHCs have an obligation to ensure that all patients have equal access to services. 42 U.S.C. § 254b(k)(3)(A). Meeting that obligation is logistically impossible if only one pharmacy serves a large service or “catchment” area.

Lilly has also made a meaningless exception to allow contract pharmacies to offer insulin through contract pharmacies, subject to several conditions not stated in the 340B statute:

- Any and all 340B eligible patients will be able to acquire their Lilly insulins through the contract pharmacy at the 340B price (typically \$.03 per 3 mL pen or \$.10 per 10 mL vial) at the point-of-sale;
- Neither the covered entity nor the contract pharmacy marks-up or otherwise charges a dispensing fee for the Lilly insulin;
- No insurer or payer is billed for the Lilly insulin dispensed; and,
- The covered entity provides claim-level detail (CLD) demonstrating satisfaction of these terms and conditions.

Lilly LDP. However, these four requirements make the exception completely unworkable and legally suspect. Lilly’s exception requires that the pharmacy not charge a dispensing fee for providing the drug. This requirement could subject Amici to violations of the federal law that

---

<sup>30</sup> The Declaration of D. Tucker Slingerland, M.D. is submitted as Exhibit B to this brief (Ex. B, “Slingerland Aff.”)

prohibits offering financial inducements to patients.<sup>31</sup> Moreover, it is entirely impractical to expect a pharmacy to fill a prescription for free. Thus, Amici cannot use Lilly's insulin "exception" for their patients.

The affidavit from Optimus Health Care Inc. provides just a few examples of the negative impact Lilly's actions have already had on covered entity patients. Spinelli Aff. ¶ 12. One Optimus patient, who is visually impaired and does not speak English, previously paid only \$15 a month for Lilly insulin prior to Lilly's new policy. Spinelli Aff. ¶ 23. When she attempted to refill her prescription on September 4, 2020, the price was \$270. *Id.* An Optimus patient with gestational diabetes relied on Lilly insulin to help manage her high-risk pregnancy, but twenty-seven weeks into her pregnancy, Lilly's new policy resulted in a price of \$320 for her insulin, which she could not afford. Spinelli Aff. ¶ 24. These patients are left without these crucial safety-net protections due to Lilly's policy.

Moreover, in response to Lilly's actions, covered entities have generally struggled to switch patients' medications to affordable alternatives, especially given that certain medications do not have an approved generic formulation. Chen Aff. ¶ 34; Francis Aff. ¶¶ 24, 26. Many patients want to continue taking familiar medications or are fearful of the negative health impact of changing to a new medication. Richards Aff. ¶ 23; Francis Aff. ¶ 26. Additionally, before a patient can change medications, a medical provider must "review the patient chart, consider comorbidities, and assess the appropriate dosing for the substitute medication." Francis Aff. ¶ 26. If the new drug treatment has different dosing, this could require significant patient education

---

<sup>31</sup> Offering inducements to Medicare or Medicaid beneficiaries can subject a provider or supplier of services that are payable by Medicare or Medicaid to Civil Monetary Penalties. 42 U.S.C. § 1320a-7a(a)(5). Routinely providing drugs free of charge to all patients, regardless of ability to pay is not an exception to the inducement prohibition. 42 U.S.C. § 1320a-7a(i)(6); 42 C.F.R. § 1003.110. Such a scheme could also be viewed as a violation of the antikickback statute insofar as it causes Medicare or Medicaid beneficiaries to "self-refer" to the participating pharmacy. 42 U.S.C. § 1320a-7b(b)(1).

and “provider troubleshooting” to avoid adverse health outcomes. *Id.* The administrative and clinical burden of largescale shifts in patient medication regimes presents an unanticipated strain on covered entity staffing, removing resources from day-to-day patient care.

Another distressed covered entity, Crescent Community Health Center (Crescent Community Health) in Dubuque, Iowa, notes that Lilly’s and other drug companies’ actions will cause many patients to lose access to diabetes, hypertension, asthma/chronic obstructive pulmonary disease (“COPD”), and heart disease medications. Rickertsen Aff. ¶ 30. Crescent Community Health’s clinical pharmacy director determined that approximately thirty-two uninsured patients will be unable to afford asthma/COPD medications, seventy-six diabetic patients will lose access to critical oral medications to treat diabetes, fifty-one patients will lose access to their insulin, and forty patients will lose access to medications to treat other acute and chronic conditions. Rickertsen Aff. ¶ 30. These patients have no choice but to ration their medications, leading to a decline in their health and increased uninsured hospital costs just as rural hospitals cope with the COVID public health emergency. Rickertsen Aff. ¶ 12, 19, 30.

**B. Covered Entities Rely on 340B Contract Pharmacy Savings to Pay for Necessary and Required Health Care and Related Services**

Covered entities use 340B Program savings to subsidize the cost of important and life-saving health care services. For insured patients, covered entities benefit from the difference between the 340B price and the insurer’s payment for the drug. Covered entities use these funds to supplement their federal grants and other program income, thereby “reaching more eligible patients and providing more comprehensive services” as Congress intended. H.R. Rep. No. 102-384(II), at 12 (1992). Many of the programs and services that covered entities support with 340B savings are critical to treating the whole patient, but are not reimbursed by public or private insurance, and are often most needed by patients who lack insurance altogether. Auclair

Aff. ¶¶ 21-22; Glover Aff. ¶ 15; Simila Aff. ¶ 18; Slingerland Aff. ¶ 7. Congress designed the 340B Program to provide a funding stream for just these sorts of programs and services. And for decades, FQHCs have structured their operations in reliance on 340B funding, just as Congress intended. *See, e.g.*, Auclair Aff. ¶¶ 6-7; Glover Aff. ¶¶ 11, 25; Slingerland Aff. ¶ 11.

FQHCs and RWCs provide, among other services, case management to assist patients with transportation, insurance enrollment, links to affordable housing resources, food access, patient care advocacy, in-home support, and education for chronic health care conditions. Auclair Aff. ¶¶ 12–16, 22 (noting provision of behavioral health services at local public schools for students and families); Glover Aff. ¶¶ 11, 14–15; Slingerland Aff. ¶ 7 (noting that 340B savings are used to “improve infrastructure, renovating facilities, and expanding services into underserved communities in Northeastern New York who otherwise would have limited or no local access to care.”). Case management and care coordination are particularly critical for homeless and indigent individuals, who require these services to encourage their use of necessary primary and other health care services. Auclair Aff. ¶ 17; Glover Aff. ¶ 26; *see also* 42 U.S.C. § 254b(a)(1) (designating the homeless as one of four patient populations served); RWC-340B, *Value of Ryan White Providers and Impacts Associated with Resource Reduction*, 2–3 (Oct. 2020) (Ryan White patients are more likely to be homeless than general HIV/AIDS population). Education and in-home assistance for patients with chronic health conditions are also vitally important for disease management and the prevention of exacerbation or deterioration that would require more costly care. Glover Aff. ¶¶ 15, 27; *see also* NACHC, *Community Health Center Chartbook 2020* (Jan. 2020), Figs. 1-11 (number of health center patients diagnosed with a chronic health condition grew 25% from 2013 to 2017), 1-10 (21% of FQHC patients have

diabetes compared to the national rate of 11%).<sup>32</sup>

Covered entities also rely on 340B funding to provide a range of other critical services responsive to serious ongoing public health crises, such as medication assisted treatment programs and other treatment options for opioid use disorder, and fighting the COVID-19 pandemic. *See* Auclair Aff. ¶ 15; Glover ¶ 14; Simila Aff. ¶ 5; Francis Aff. ¶ 9; Slingerland Aff. ¶ 7; *see also* HRSA, Bureau of Primary Health Care, *2018 Health Center Data: National Data, Other Data Elements* (2019) (FQHCs are “the first line of care in combatting the Nation’s opioid crisis,” screening and identifying nearly 1.4 million people for substance use disorder, providing medication-assisted treatment to nearly 143,000 patients, providing over 2.7 million HIV tests, and treating 1 in 5 patients diagnosed with HIV nationally).

Lilly’s deprivation of 340B discounts has already resulted in cuts and reductions to critical FQHC and RWC services supported in whole or in part with 340B-derived funding. *See, e.g.,* Auclair Aff. ¶ 23 (Little Rivers will lose approximately \$44,860.35 annually in 340B savings as a result of the decision by Lilly not to honor contract pharmacy arrangements); Glover Aff. ¶ 22; Dickerson Aff. ¶ 6; Spinelli Aff. ¶¶ 28–30 (estimating annual revenue loss of over \$560,000 from drug manufactures refusal to offer 340B pricing, which risks vital primary care services including dental, podiatry, clinical nutrition, and others); Richards Aff. ¶¶ 24, 25 (estimating annual loss of \$350,000 due to 340B restrictions, forcing reduction in services); Rickertsen Aff. ¶¶ 34, 36 (estimating annual loss of \$1 million in revenue and \$500,000 to \$2 million in increased cost of goods sold, forcing reduction in coverage of patient copays, clinical pharmacy programs, enabling services, care coordination, and Pacific Islander health program). HHHN estimates that it will lose \$8,400,000 in revenue due to manufacturer actions to cut off

---

<sup>32</sup> <http://www.nachc.org/wp-content/uploads/2020/01/Chartbook-2020-Final.pdf>.

access to 340B drugs at contract pharmacies. Slingerland Aff. ¶¶ 20-23. Community HealthCare System in St. Marys, Kansas recently announced that it is closing its emergency room and reducing its inpatient beds due, in part, to manufacturers’ restrictive 340B contract pharmacy policies. WIBW, *Community HealthCare System in St. Marys to close emergency room doors, adjust services* (Apr. 28, 2021).<sup>33</sup>

Without preventive and enabling services, patient health will undoubtedly suffer. Patients will require additional, more expensive health care visits at the Amici’s locations and more expensive hospital and specialist care. Auclair Aff. ¶¶ 28–29; Glover Aff. ¶¶ 26–27; *see also* Robert S. Nocon, et al., *Health Care Use and Spending for Medicaid Enrollees in Fed. Qualified Health Ctrs. Versus Other Primary Care Settings*, Am. J. Public Health (Sep. 15, 2016) (“Medicaid patients who obtain primary care at FQHCs had lower use and spending than did similar patients in other primary care settings”). The cost of providing additional health care visits will further strain Amici’s and other covered entities’ resources.

Lilly’s and other drug companies’ refusal to offer drugs at 340B discount pricing has also already resulted in covered entities reducing staff. *See, e.g.*, Simila Aff. ¶ 29 (health center forced to reduce staffing for OB/GYN services and planning other major service reductions—including service delivery site closures, employee terminations, reductions in health care providers, and likely closure of OB/GYN, dental, and mental health services); Mahaniah Aff. ¶ 20 (health center preparing to permanently eliminate 5% of employees); Chen Aff. ¶ 42 (indicating likely elimination of clinical pharmacists and closure of one or more rural clinic locations); Richards Aff. ¶ 25 (significant financial loss will result in reduction in clinical and patient services); Slingerland Aff. ¶ 23 (noting that HHHN may be forced to close its Women’s

---

<sup>33</sup> <https://www.wibw.com/2021/04/28/community-healthcare-system-in-st-marys-to-close-emergency-room-doors-adjust-services/>.

Health Center). FQHCs and RWCs will also have to divert remaining staff to attempt to provide alternative or palliative services to vulnerable patients and seek out additional federal grants or other sources of funding to make up for lost 340B funding. *See, e.g.*, Chen Aff. ¶ 40; Auclair Aff. ¶ 30; Glover Aff. ¶ 28; Dickerson Aff. ¶ 9; Slingerland Aff. ¶ 21. Expending already scarce financial and human resources will further burden tight budgets and cause additional and unbearable operational expenses. Auclair Aff. ¶ 27-28; Glover Aff. ¶ 28; Dickerson Aff. ¶ 9.

Many covered entities, including numerous NACHC and RWC-340B members, as well as Amici Little Rivers and FamilyCare, rely entirely on contract pharmacies to dispense covered outpatient drugs to their patients. *See, e.g.* Auclair Aff. ¶ 19; Glover Aff. ¶ 18; Slingerland Aff. ¶ 10. For some covered entities, 340B Program revenue has meant the difference between remaining in operation and closing their doors. For FamilyCare, revenue from its contract pharmacy arrangements is comparatively almost half of the funding it receives from federal grants. Glover Aff. ¶ 21; Dickerson Aff. ¶¶ 4-5. The loss of all 340B savings to the Amici would be even more “devastating” to their operations and the patients they serve. Auclair Aff. ¶ 34; Glover Aff. ¶ 31; Dickerson Aff. ¶ 11; Slingerland Aff. ¶¶ 19-23. Little Rivers currently operates at a loss and FamilyCare’s revenue barely exceeds its operating expenses. Dickerson Aff. ¶ 7. In 2019, Little Rivers’ average cost per patient was \$1,270.64; FamilyCare’s average cost per patient was \$764.39. HRSA, *Health Center Program Data*.<sup>34</sup> Per patient costs will increase dramatically if these providers are burdened with covering the full price of Lilly’s drugs. Many covered entities, including Amici Little Rivers and FamilyCare, lack the financial resources necessary to bear the additional costs of drugs for indigent patients. Auclair Aff. ¶ 38.

<sup>34</sup> <https://data.hrsa.gov/tools/data-reporting/program-data?grantNum=H80CS06658> (last visited June 11, 2021).

## CONCLUSION

Granting Lilly's motion would significantly harm covered entities, their patients, their staff, and the health care safety-net community by freeing Lilly and other drug companies from their obligations under the 340B statute, upending an over two-decades-long status quo on which FQHCs and RWCs depend, and leaving covered entities with no remedy. HHS's May 17 letter describes what Lilly has understood for decades—drug companies that choose to participate in the 340B federal drug pricing program are required to offer to covered entities 340B pricing, regardless of where the drugs are dispensed to the covered entity's patients. The ADR Rule provides covered entities with the administrative proceeding they need to correct the harms Lilly and other manufacturers have caused by flouting their obligations under the 340B statute. For the above reasons, Amici respectfully request that the Court grant HHS's motion to dismiss and motion for summary judgment and deny Lilly's cross-motion for summary judgment.

**AFFIDAVIT**

I, Gail Auclair, M.S.M.-H.S.A., B.S.N., R.N., hereby attest and state as follows:

- 1) I am the Chief Executive Officer of Little Rivers Health Care, Inc. ("Little Rivers"). I have held this position for fourteen (14) years. I have forty (40) years of experience as a nurse.
- 2) Little Rivers has three facilities in Vermont. The facilities are located in Wells River, Bradford, and East Corinth, Vermont.
- 3) The stated mission of Little Rivers is as follows:

Our mission is to provide respectful, comprehensive primary health care for all residents in our region, regardless of their ability to pay. We offer quality health care services to everyone. In the spirit of community, we make efforts to reach out and welcome those who need health services, but may have insufficient means to access them. We commit ourselves to continually reduce the burden of illness, injury, and disability, and to improve the health and quality of life of those for whom we care.<sup>1</sup>

---

<sup>1</sup> Source: <https://www.littlerivers.org/about>.

- 4) One of our guiding principles for patient care is that Little Rivers provides holistic care that takes the patients' social, emotional and situational needs into consideration to support them in managing their health.
- 5) Little Rivers provides patient care services covering a wide variety of specialties, including Family Medicine, Pediatrics, Obstetrics, Behavioral Health and Oral Health Care.
- 6) Little Rivers is certified by the United States Department of Health and Human Services as a Federally Qualified Health Center ("FQHC").
- 7) FQHCs are providers of primary care services that must comply with certain federal requirements, including being operated by a Board of Directors that is comprised of at least 51% of individuals who are active patients of the clinic and who represent the individuals served by the health center in terms of such factors as race, ethnicity, and gender. FQHCs provide health care services regardless of a patient's ability to pay, and charge for services on a sliding fee scale according to the patient's financial resources. Little Rivers complies with all requirements to be certified as an FQHC.
- 8) In 2019, Little Rivers provided services to 5,561 patients. Approximately 15.46% of these patients were under the age of 18 and 25.68% were 65 years of age or older.<sup>2</sup>
- 9) In 2019, Little Rivers patients included 93 agricultural workers and families, 46 homeless individuals, 265 veterans, 261 uninsured and 37 prenatal patients.<sup>3</sup>
- 10) In 2019, Little Rivers provided mental health services to 519 patients and Little Rivers conducted 4,304 behavioral health visits.<sup>4</sup>

<sup>4</sup> Source: Little Rivers 2019 Annual Report, p. 6 and 10 (available at littlerivers.org).

- 11) In 2019, Little Rivers served 475 children in its dental health program, many of whom would not have received preventative care services had Little Rivers not provided it. Little Rivers also held fluoride varnish days in our Bradford and Wells River clinics, where medical providers offered screenings and fluoride treatments to children free of charge.<sup>5</sup>
- 12) Little Rivers operates a chronic care management program to assist patients with chronic diseases. Patients in the chronic care management program receive individualized education and assistance from a registered nurse to help the patient manage their chronic conditions. Registered nurses also visit patients in their homes between health care visits at a Little Rivers facility. In 2019, 105 patients were enrolled in the Little Rivers' chronic care management program.<sup>6</sup>
- 13) Little Rivers works with Willing Hands, a non-profit, charitable organization with a mission to receive and distribute donations of fresh food that otherwise might go to waste in order to improve health and provide reliable access to nutritious food for community members in need. A Little Rivers employee coordinates with Willing Hands to distribute fresh produce and dairy to Little Rivers' clinics for care coordinators to deliver to patients in need.<sup>7</sup>
- 14) Little Rivers offers behavioral health services at local public schools that include counseling for students and families. At some public schools, Little Rivers provides extensive training and education for faculty and staff regarding resiliency, classroom

<sup>6</sup> Source: Little Rivers 2019 Annual Report, p. 9 (available at [littlerivers.org](http://littlerivers.org)).

<sup>7</sup> Source: Little Rivers 2019 Annual Report, p. 14 (available at [littlerivers.org](http://littlerivers.org)).

behaviors, and trauma-informed approaches.<sup>8</sup> (Trauma-informed care recognizes the presence of trauma symptoms and the role that trauma may play in an individual's life.)

15) Little Rivers operates a Medication Assisted Treatment ("MAT") program, which provides services to individuals who are on a drug regimen to treat addiction.

16) A critical component of the health care that Little Rivers provides is its care coordination services. Little Rivers employs six care coordinators, including at least one care coordinator who specializes in behavioral health issues and works with patients to "improve their overall social-emotional wellbeing. Care coordinators provide assistance with transportation, insurance enrollment, sliding fee discount eligibility, linkage to affordable housing, food access, and patient care advocacy."<sup>9</sup>

17) Based on my 40 years of experience as a registered nurse, care coordination is a vital factor in helping our patients to stay well and manage their health care conditions. Without care coordinators, many of Little Rivers' patients would not be able to access the health care that they need or obtain affordable housing or food. These services are critical in preventing our patients' health from deteriorating. Care coordination is particularly important for homeless and indigent individuals, who require additional support services to ensure that they continue to receive necessary health care services.

18) Little Rivers offers a sliding fee scale to patients whose incomes are under 200% of the Federal Poverty Level. This discount includes access to prescription drugs through our 340B program when they receive a prescription as the result of health care services provided by Little Rivers. If a patient's income is at or below 100% of the federal poverty level, and the patient does not have insurance coverage for retail prescription

---

<sup>8</sup> Source: Little Rivers 2019 Annual Report, p. 6 (available at [littlerivers.org](http://littlerivers.org)).

<sup>9</sup> Source: Little Rivers 2019 Annual Report, p. 7 (available at [littlerivers.org](http://littlerivers.org)).

drugs, Little Rivers pays 100% of that patient's drug costs. For patients whose income is between 100% and 200% of the federal poverty level, Little Rivers pays a percentage of the cost of the drug (25%, 50% or 75%, depending on the patient's income level). Most of our patients in the sliding fee program qualify for the 100% discount.

19) Little Rivers does not operate an in-house retail pharmacy. It relies exclusively on contract pharmacy arrangements to dispense 340B retail drugs to its patients.

20) Little Rivers has four contract pharmacies arrangements registered with the 340B program and listed on the Office of Pharmacy Affairs ("OPA") database. Little Rivers has registered three Wal-Mart locations. Two of those locations (Texas and Florida), however, are for repackaging drugs for sale at retail pharmacies, including repackaging for distribution by the Wal-Mart retail pharmacy in New Hampshire, which is the third Wal-Mart registration. Stated differently, only two of the contract pharmacies registered by Little Rivers on the OPA database dispense 340B drugs directly to Little Rivers' patients.

21) The savings from Little Rivers' contract pharmacy arrangements allow it to: 1) pay for drugs needed by its patients who cannot afford to pay for the drugs; and 2) pay for support services for its patients that are not covered by insurance or paid for through grant funding.

22) All of the services described above are provided to patients without insurance and to patients whose insurance does not cover the services. In addition, the costs of these services are not covered, or not fully covered, by grant funding.

23) Based on its calculations of the 340B savings that Little Rivers has historically achieved through filling prescriptions for drugs manufactured by Defendant, Little Rivers will lose approximately \$44,860.35 annually in 340B savings as a result of the decision by

Defendant not to honor contract pharmacy arrangements. This calculation was based on data from the period September 1, 2020 to December 30, 2020 and extrapolated to an annual calculation.

24) In 2018 and 2019, Little Rivers operated at a loss. In 2019, Little Rivers' expenses exceeded its revenues by \$188,451. In 2018, Little Rivers' expenses exceeded its revenues by \$289,380.<sup>10</sup>

25) The COVID-19 public health emergency ("PHE") has had a detrimental impact on Little Rivers' finances because patients have been reluctant to schedule in-person appointments for health care services. Despite government aid to Little Rivers, its monthly revenue has decreased by approximately 10% since the start of the PHE.

26) Currently, Little Rivers has lost some employees by attrition but has not filled those positions due to financial constraints.

27) Little Rivers will have to cut or eliminate some of the services that it provides, or make salary cuts to current employees, if Little Rivers loses \$44,860.35 annually as the result of the actions of Defendant.

28) Cutting or eliminating services to Little Rivers' patients will be detrimental to the patients' health and well-being. As one example, if Little Rivers has to reduce or eliminate its chronic care management program which educates patients about preventative care, the health care condition of the patients in that program is likely to deteriorate. Similarly, if Little Rivers has to reduce or eliminate its care coordination services, patients will be at risk of not being connected to necessary health care services,

---

<sup>10</sup> Source: Little Rivers 2019 Annual Report, p. 13 (available at [littlerivers.org](http://littlerivers.org)).

affordable housing opportunities, or access to low-cost food. Cutting staff salaries will decrease morale and potentially result in valuable staff seeking employment elsewhere.

29) If Little Rivers' patients do not receive the full range of support services that Little Rivers currently provides, their health is likely to decline and they are more likely to require additional and more extensive and expensive health care visits at Little Rivers and at hospitals and specialists. The cost of providing additional health care visits not previously accounted for will cause a strain on Little Rivers' resources.

30) In order to continue to provide at least some of the services that Little Rivers currently offers to its patients, Little Rivers will have to seek other funding sources, either through increased donations or additional grant funding.

31) The mission of Little Rivers, which is to provide "comprehensive primary health care" and "to improve the health and quality of life of those for whom we care" will be compromised if Little Rivers is not able to provide the full range of support services that it currently provides due to the unavailability of 340B discounts on drugs manufactured by Defendant. We will be hampered in our goal to provide for our patients with the affordable, comprehensive, and holistic care they need and deserve.

32) Little Rivers will not be able to provide low-cost drugs through its drug discount program if Little Rivers cannot purchase drugs at 340B prices and instead will have to pay undiscounted prices for those drugs.

33) The loss of \$44,860.35 annually in 340B savings as the result of the actions of Defendant will have a severe financial impact on Little Rivers. Little Rivers strives to keep three months' operating expenses in reserves, which is consistent with sound business practices and guidance from the Bureau of Primary Care within the Health Resources and Services

Administration, the federal agency that administers the FQHC program. Little Rivers often struggles to meet this goal and the loss of \$44,860.35 annually will exacerbate the problem and impose undue operational and financial burdens on Little Rivers.

34) I am concerned that other drug manufacturers will follow the lead of Defendant and decide to no longer provide 340B pricing through contract pharmacies. AstraZeneca and Sanofi-Aventis US LLC, and their corporate affiliates, have already restricted access to 340B pricing at contract pharmacies under policies similar to Defendants' policy. If Little Rivers lost access to 340B pricing for all retail drugs, it would be devastating to Little Rivers' operations and the patients it serves.

35) Humalog® KwikPen is a small, lightweight pen that is prefilled with insulin for use by insulin-dependent diabetics at mealtime. I requested information from Hudson Headwaters, which assists Little Rivers in processing 340B contract pharmacy claims, to provide pricing on the 340B price and non-340B price of Humalog® KwikPen. Hudson Headwaters provided this pricing information, effective on May 23, 2021:

<b>NDC</b>	<b>Average Wholesale Price</b>	<b>Wholesale Acquisition Cost</b>	<b>340B Cost</b>
00002879959-HUMALOG KWIK PEN 5X3ML	\$636.48	\$530.40	\$0.16

36) Some of Little Rivers' financially needy patients are prescribed Humalog® KwikPen and Little Rivers will no longer be able to offer the Humalog® KwikPen at the 340B discounted pricing to those patients.

37) Defendant has a policy under which it provides insulin at 340B prices through contract pharmacies but that policy requires that: 1) the covered entity provide the 340B price at

point of sale to all patients regardless of ability to pay; (2) the contract pharmacy not charge any dispensing fees; (3) no insurer or other payer is billed for the drug; (4) the covered entity provide claims level data to demonstrative compliance. The Lilly policy is completely unworkable. Contract pharmacies will not dispense drugs without charging a dispensing fee and there is no reason that covered entities should be required to submit claims level detail in order to take advantage of this program.

38) Because Little Rivers has operated at a loss for the last two fiscal years, it does not have the financial resources to bear the additional cost of these drugs for our financially needy patients. The increased costs to Little Rivers to pay for the drugs under its drug discount program will exacerbate its already precarious financial position.

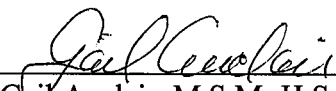

39) The U.S. Department of Health and Human Services (“HHS”) has implemented a statutorily mandated Administrative Dispute Resolution (“ADR”) process for 340B covered entities and manufacturers to resolve certain 340B program disputes. *See* 42 U.S.C. § 256b(d)(3)(A); 42 C.F.R. § 10.20-10.24. On February 4, 2021, Little Rivers filed an ADR petition against AstraZeneca. The Little Rivers ADR petition contends that AstraZeneca has violated the 340B statute by declining to ship 340B discounted drugs to Little Rivers’ contract pharmacies.

40) If the injunction against enforcement of the ADR process against Defendant is lifted, Little Rivers will have the ability to bring an ADR petition against Lilly to request relief from its policy not to offer 340B pricing at contract pharmacies.

*[Signature on next page]*

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed this 26th day of May 2021.

Respectfully submitted,

**Declaration of D. Tucker Slingerland, M.D.**

I, D. Tucker Slingerland, M.D., declare as follows:

1. I am Chief Executive Officer for Hudson Headwaters Health Network (HHHN) and have held this role since July 1, 2017. As Chief Executive Officer I am responsible for responsible for the overall performance of the organization, including clinical, administrative, finance, and governance functions and related activities for the purpose of attaining the goals and strategies as set forth by the Board of Directors. This includes oversight of our 340B Drug Pricing Program management and compliance. To prepare this declaration, I consulted with our Chief Financial Officer, Chief Information Officer, Chief Medical Officer, Chief Operations Officer, and the President of Hudson Headwaters 340B, LLC.
2. I have personal knowledge of all facts stated in this declaration, and if called to testify, I could and would testify truthfully thereto.
3. Hudson Headwaters Health Network is a Federally-qualified health center that receives federal grant funds under Section 330 of the Public Health Service Act. Hudson Headwaters Health Network, a not-for-profit 501(c)3 organization, has served the Adirondack and North Country regions of Upstate New York as a Federally-qualified health center since 1981. Hudson Headwaters Health Network's service area includes the southern, eastern, and Tri-Lakes regions of the Adirondack Park, the City of Glens Falls and its surrounding suburbs, and the northern corridor communities centered on the Towns of Champlain and Plattsburg near the Canadian border. The area is approximately 140 miles by 50 miles (or 7,000-square miles) and mostly rural, with limited east-west transportation routes. The region is designated by the federal Bureau of Health Workforce as Health Professional Shortage Area due to significant health care provider shortages in primary care, dental health, and mental health. In many towns, HHHN is the sole medical provider.
4. In 2019, Hudson Headwaters Health Network provided care to 90,077 unique patients through 363,911 primary medical, dental, and behavioral health visits. Of 45,608 patients for whom income is known, 51.8% live at or below 200% of Federal poverty guidelines. Of

Hudson Headwater Health Network's 90,077 patients, 21.3% are covered under Medicaid, 25.9% are covered under Medicare or are dual-eligible, 2.1% are covered under another form of public insurance, 46.4% are covered by private insurance, and 4.3% are uninsured.

5. Hudson Headwaters Health Network is a "covered entity" for purposes of the 340B Drug Program. HHHN was approved as a covered entity in the 340B Drug Pricing Program on April 1, 2001. As required by law, it recertifies this status annually with the Health Resources and Services Administration (HRSA).
6. The 340B Drug Program allows Hudson Headwaters Health Network to purchase outpatient prescription drugs from manufacturers or wholesalers at a significant discount. HHHN purchases drugs from wholesalers via one third party administrator for its 101 contract pharmacies.
7. Hudson Headwaters Health Network's participation in the 340B Drug Program helps it to stretch scarce resources and meet the needs of its medically underserved patients, including uninsured and underinsured patients. Federal law and regulations, as well as Hudson Headwaters Health Network's mission, require that every penny of 340B savings be invested in services that expand access for its medically underserved patient population. HHHN uses 340B savings to provide medication discounts and other financial assistance programs for uninsured patients and those living at or below 200% of the federal poverty level. In addition, Hudson Headwaters Health Network uses 340B savings to support core programs and services that are consistent with its mission, including dental care, patient and student education, home-based care, obstetrics and gynecology, palliative care, and phlebotomy. HHHN also uses these revenues to offset the costs of COVID-19 antigen and antibody testing in its service area. Finally, Hudson Headwaters Health Network also uses 340B savings to improve infrastructure, renovating facilities, and expanding services into underserved communities in Northeastern New York who otherwise would have limited or no local access to care.
8. From January 1, 2019 to December 31, 2019, Hudson Headwaters Health Network captured 51,066 prescriptions for 340B savings at its 101 contract pharmacies.
9. As a covered entity, Hudson Headwaters Health Network is permitted to choose how it will deliver pharmacy services to its patients. HHHN does this by contract pharmacy prescription capture. Hudson Headwaters Health Network has 101 contract pharmacies through 13 written agreements. A list of active contract pharmacies and locations is provided in the attached "Hudson Headwaters Health Network Active Contract Pharmacies."
10. Hudson Headwaters Health Network does not operate an in-house pharmacy. Given the Network's 7,000 square mile service area, by necessity HHHN must rely on contract pharmacies to provide 340B-eligible prescription drugs to its patients. The use of contract pharmacies has greatly expanded Hudson Headwaters Health Network patients' ability to

access affordable drugs, given the size and geographic isolation of the Network. There is only one major road, Interstate 87, that traverses the area from north to south. No four-lane highways cross the service area from east to west, so residents of the region must travel on mountainous two-lane roads to access services. Patients living within the Adirondack Park or North Country must travel significant distances for treatment and care. Public transportation is available in the towns of Plattsburgh and Glens Falls, but there is no public transportation elsewhere in the region. The nearly six months of winter conditions in the region, often rendering roads impassable for days at a time, also complicates travel. To minimize these geographic and logistical barriers to accessing prescription drugs, HHHN has agreements with 101 contract pharmacies. The use of contract pharmacies also increases the Network's 'capture rate' (i.e., the percentage of prescriptions written by the health center for its patients). This allows Hudson Headwaters Health Network to retain more 340B savings, and therefore support more services for its patients.

11. Hudson Headwaters Health Network's use of contract pharmacies is authorized under the Section 330 statute that authorizes the Federally-qualified health center program. That statute allows organizations like HHHN to contract out for required services that they do not provide.
12. In 2018, Hudson Headwaters Health Network estimates that 340B savings generated from contract pharmacies accounts for about 31.0% of our direct patient care expenses.
13. On or about July 30, 2020, I became aware that certain drug manufacturers, including Astra Zeneca, Eli Lilly, Merck, Novartis, and Sanofi, had unilaterally decided, without government approval, to cease providing outpatient prescription drugs at 340B prices to most or all of Hudson Headwaters Health Network's contract pharmacies.
14. On or about November 2, 2020, I became aware that Novartis had unilaterally decided to honor contract pharmacy arrangements as long as they're within 40 miles of a Hudson Headwaters Health Network facility. I also became aware that Novartis had again begun providing outpatient prescription drugs at 340B prices to some but not all of HHHN's contract pharmacies.
15. Because of the actions taken by certain drug manufacturers, including Astra Zeneca, Eli Lilly, Merck, Novartis, and Sanofi, some Hudson Headwaters Health Network patients have decreased access to critically needed medicines. Other patients still have access to their eligible medications at their local pharmacy, but HHHN will no longer receive the 340B revenue.
16. In 2011, the U.S. Supreme Court held that 340B-covered entities like Hudson Headwaters Health Network do not have the right to sue drug manufacturers for overcharges. Only the Secretary of the Department of Health and Human Services may enforce the pricing requirements of the 340B Drug Program. *Astra*, 563 U.S. at 113-14. This ruling was

premised, in part, on the Department of Health and Human Services' representation that an administrative dispute resolution process as required by Section 7102 of the Patient Protection and Affordable Care Act would be forthcoming:

The [2010 administrative dispute resolution provision] provides for more rigorous enforcement [and] directs the Secretary to develop formal procedures for resolving overcharge claims. Under those procedures, which are not yet in place, HRSA will reach an 'administrative resolution' that is subject to judicial review under the Administrative Procedure Act (APA). *Astra*, 563 U.S. at 116.

18. Due to the Department of Health and Human Services lack of action to enforce the 340B statute, include the failure to implement an administrative dispute resolution process as required by Section 7102 of the Patient Protection and Affordable Care Act, Hudson Headwaters Health Network has no legal recourse to remedy manufacturer overcharging for 340B-covered drugs.
19. Hudson Headwaters Health Network is suffering immediate and irreparable harm from the Secretary's failure to enforce its right to purchase discounted 340B-eligible drugs via contract pharmacy arrangements.
20. Based on an analysis of current 340B-eligible drugs currently prescribed to patients, HHHN will lose approximately \$8,400,000 in revenue as a result of the actions taken unilaterally by the drug manufacturers.
21. As a result of the loss in revenue, key patient services and programs are at risk of being diminished or potentially eliminated. This includes reducing provider, nursing, and care management staffing levels, eliminating the prescription drug assistance program, altering the sliding fee scale, reducing palliative care and home-based health services, and eliminating the direct provision of specialty services like dental, obstetrics and gynecology, and phlebotomy. COVID-19 testing services could be reduced or eliminated at a time when the pandemic still threatens the health and well-being of Americans.
22. In addition to this reduction or loss of services, reduced contract pharmacy 340B savings would negatively affect plans for renovations to modernize existing health centers and planned expansion of services into unserved areas of New York's Clinton, Franklin, and Washington Counties.
23. Reduced contract pharmacy 340B savings may also result in the closing of Hudson Headwaters Women's Health Center (currently staffed by 50 employees, including seven physicians, one physician assistant, one nurse practitioner, and nine nurse-midwives) or other health centers in rural areas, further reducing patient access to care in a region that is already designated as a Health Professional Shortage Area.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on December 10, 2020

D. Tucker Strupeland, MD
